Index by Subject to Algorithms

Algorithms published elsewhere are included, when known to us.
***Key*. The first column, A1, B1, C2, C5, lists the key to the classification system categories; second column lists the number of the algorithm; third column lists the title of the algorithm; fourth column lists month, year, pages (in parentheses) in CACM or reference elsewhere.**
This yearly index is published in the December issue of Communications and is a supplement to the "Index by Subject to Algorithms, 1960–1968," *Comm. ACM 11*, 12 (Dec. 1968), 827–830.

Index to Communications of the ACM Volume 14, 1971

I. BIBLIOGRAPHY
II. AUTHOR INDEX
III. DEPARTMENT INDEX

Entries in this Index are for the technical papers, reports, articles, and short communications that appeared under the heading "contributions" on the contents pages of the 12 issues of the year. Algorithms are indexed separately; the "Index by Subject to Algorithms 1971" is on page 808 of this issue.

The KEY in each entry gives the year and volume number (7114), the issue number (which is also the number of the month), and the beginning page number.

The BIBLIOGRAPHY lists the entries in order of original appearance; each entry gives the title and the name(s) of the author(s).

The AUTHOR INDEX lists the entries in order of alphabetized authors' names. If there is more than one author for a paper, each author is listed separately in alphabetical order; therefore, in this section a single entry would not include co-authors' names.

The DEPARTMENT INDEX entries are grouped according to Communications technical departments in which they appeared. Under each department heading, entries are given in order of original appearance.
